**Business Executive Advisor to GenOdyssee**

**David Brown Ph.D., FRSC**, Principle of Alchemy Biomedical Consulting, Cambridge, UK, has over 30 years experience in the pharmaceutical industry both in research and in senior executive roles. He served with 4 of the top 10 Pharma companies: Zeneca, Pfizer, Glaxo, and most recently with F. Hoffman La-Roche as Global Head of Drug Discovery, Roche Pharma. In this role he had responsibility for the output of clinical candidate drugs from approximately 2000 scientists across Roche's 5 research sites. Dr Brown has extensive experience of pharmaceutical R&D in all phases from early discovery through clinical trials, and he has experience of leading research in all major disease areas. Whilst at Pfizer he was named co-inventor on the patent for Viagra, and he led the team that developed Viagra through to proof of concept (clinical efficacy) in man. At Roche, Dr Brown also served on the committee responsible for clinical drug development and he was a core member of the Business Development Committee responsible for in-licensing of products and for technology agreements and acquisitions. Dr Brown received his PhD in Chemistry from the University of Bristol. He is an Editor-in-Chief of Current Opinion in Drug Discovery and Development, and is author of more than 50 primary and review publications and patents.
